Julia Turner	SOC_POL_333-0_20: Economics of Health, Human Cap

DEMOGRAPHICS

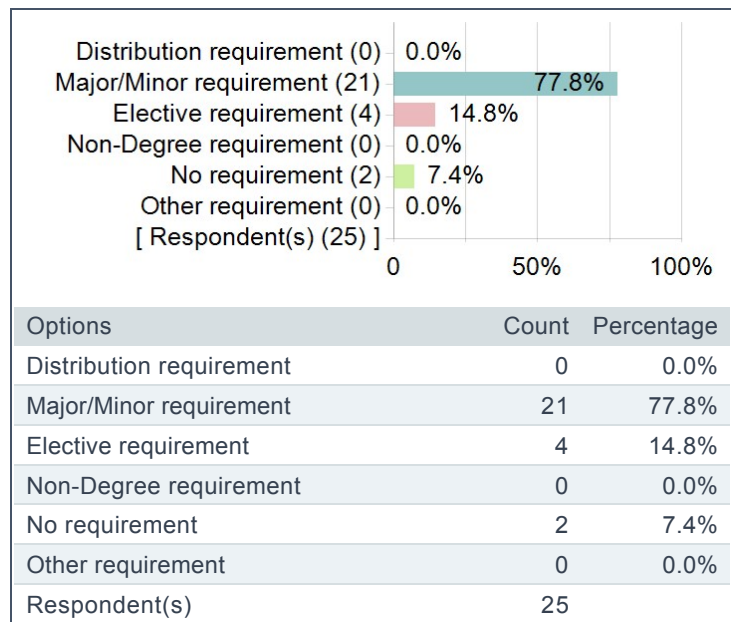

Your School

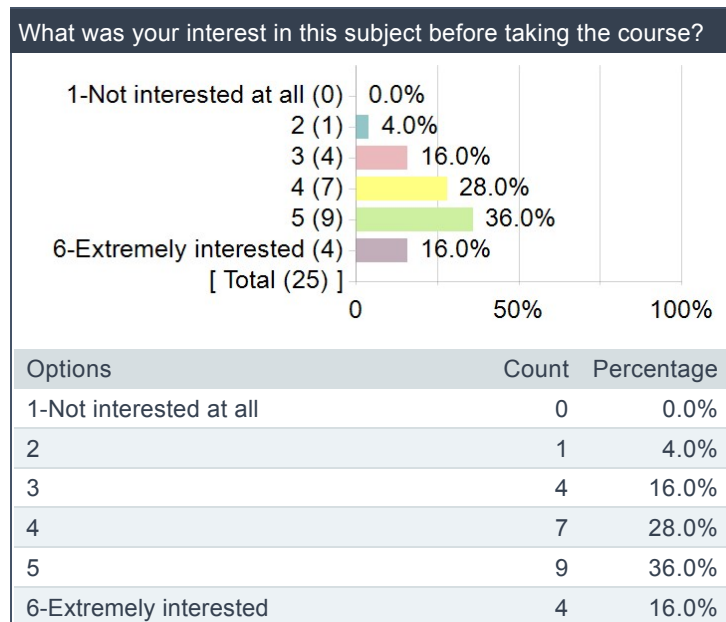

Your Class

What is your reason for taking the course? (mark all that apply)

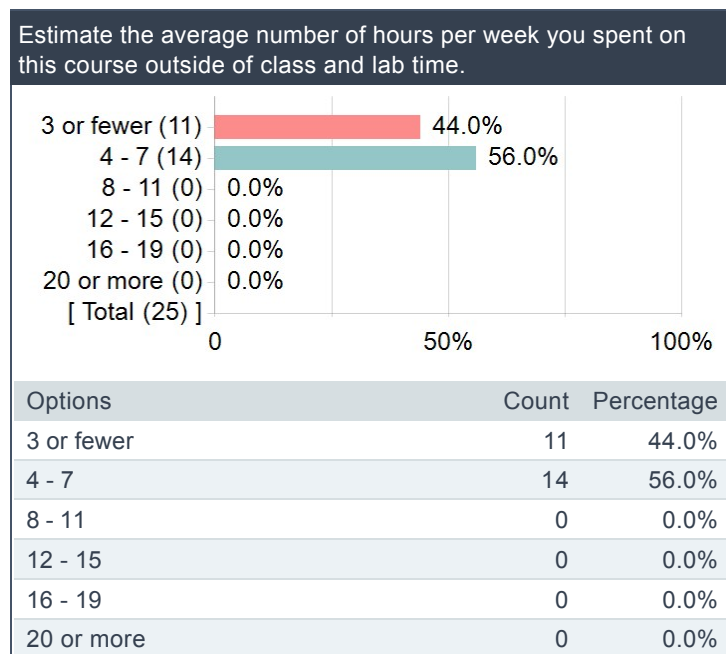

What was your interest in this subject before taking the course?

TIME-SURVEY QUESTION

Estimate the average number of hours per week you spent on this course outside of class and lab time.

TA QUESTIONS

Please rate the TA on the following criteria:

1. The TA was able to answer the students' questions adequately.					2. The TA was well prepared for each session.

OPEN-ENDED QUESTIONS

What are the primary strengths and weaknesses of the teaching assistant?

Comments
Julia was amazing. She was SO helpful with problem sets and provided a ton of office hours/review sessions before midterms and finals. Super well versed in the course material and always incredibly kind.
BEST TA I HAVE EVER HAD EVER. Julia could teach this class or really any class. She's so smart and quick. She could come up with examples to any question without a second hesitation and really explained things in ways that made perfect sense. I attended a lot of her office hours and she was so helpful and always prepared. I'm so sad to see her go.
One of the best, most invested TAs I've had! She cares a lot about students learning and puts a lot of preparation and effort into the class.
You were amazing! Thank you for being such a helpful and kind TA. Truly one of the best TA's I have had here at NU
Best TA ever
Julia is the most helpful and supportive TA at Northwestern, hands down. I don't know how I would have completed this course if not for her support, patience, and flexibility. Julia always responded to emails/questions in a timely manner, always explained concepts clearly, and was always willing to meet with students during office hours or otherwise. She also gave really helpful feedback on assignments and exams, and emphasized the concepts that were most integral to our course and learning. The world would be better with more Julia's.
I LOVE JULIA, literally the best TA ever, so nice and helpful and smart.
Julia is the best TA I have ever had. She was so approachable and very good at answering student questions (which were oftentimes very confusing/difficult to decipher). Thanks to her, I feel much more confident in both my general quantitative research and Stata skills. Julia was the MVP of this class and the Northwestern community will miss her as she goes on to work in DC! Thank you so much Julia!
Julia is the best TA i've ever had in a class!
Quite possibly the best TA I have ever had. She could've taught the course, and I was shocked that she's only in the second year of her grad program. She was prepared for every question students asked her, and patiently continued explaining concepts until everyone understood them thoroughly.
Frankly, I have yet to encounter any weakness from Julia. Julia's strengths are articulating central assumptions and conditions required for using various econometric methods. Julia is extremely approachable and is strong with communicating economic and statistical concepts, foundations, and respective examples of methods' applications to students that are not as familiar in these disciplines. She also emphasizes the proper language for making interpretations and analyses. She prepares succinct and helpful review sessions and is an overall above and beyond TA.
Best TA I've ever had!! So responsive, and so invested in helping students learn. Julia is so smart and kind.
Julia was one of the most helpful and responsive TAs I've had at northwestern!
Julia is maybe the best TA I have ever had. She is so responsive and walks through everything with such detail.
The best TA I've ever had. Would always responded to emails fast while answering absolutely everything you asked. Explained everything extremely well and made sure we always understood the content.
The best TA ever.
Julia is probably the best TA I have ever had in a Northwestern course, especially within SESP. She helped me understand so much in this course, and if she ever chooses to be a professor one day she will be a phenomenal one.
Explains concepts well, very willing to help students.
Julia is amazing. I have nothing else to say except that Julia deserves a TA award. She was super super clear in her explanations and did a great job accommodating everyone.
Best TA I've ever had
